

AISHWARYA NAYAK

AI Engineer | LLM Evaluation | GenAI Systems

Bengaluru, India | +91 89894 38322 | ashnayakwork@gmail.com | LinkedIn: <https://www.linkedin.com/in/aishwarya-nayak-/>
| GitHub: <https://github.com/A1SHWARYANAYAK>

SKILLS

AI & GenAI: LLM Evaluation, AI Benchmarking, Prompt Engineering, AI Agent Evaluation, RAG Concepts

Languages: Python, Scala, Java, SQL

Backend & Cloud: REST APIs, Microservices, Apache Kafka, Docker, AWS, GCP, Jenkins

Tools: Git, Linux, MySQL, Apache Solr

Concepts: Distributed Systems, Event-Driven Architecture, CI/CD, Software Testing

EXPERIENCE

Handshake AI — AI Evaluation Engineer

Remote (US & India Projects) | 2025 – Present

- Contributed to evaluation and benchmarking initiatives for frontier LLMs, multimodal systems, and AI coding agents across reasoning, software engineering, and scientific-integrity domains.
- Designed and evaluated 500+ benchmark tasks and adversarial test cases to assess model correctness, instruction adherence, and robustness under structured evaluation frameworks.
- Built reproducible evaluation environments using Docker, automated grading harnesses, and CI-integrated workflows to support deterministic assessment of AI coding systems.
- Analyzed 1,000+ model outputs and agent trajectories across coding, reasoning, and multimodal tasks to identify failure modes, reliability gaps, and evaluation inconsistencies.
- Contributed to scientific-integrity reviews by detecting data leakage, benchmark contamination, metric manipulation, and reasoning-to-execution mismatches in AI-generated outputs.

Mocapay — Software Engineer, Backend

Remote, India | 2021 – 2023

- Developed and maintained reactive Scala microservices supporting fintech products generating over \$10M in annual revenue.
- Designed RESTful APIs and Kafka-based event-driven workflows to improve reliability, scalability, and real-time transaction processing across distributed systems.
- Reduced deployment turnaround time by 30% through CI/CD automation using Jenkins and Docker, improving release velocity and operational stability.
- Enhanced search and data retrieval capabilities through Apache Solr integration, improving query efficiency by 25% across customer-facing applications.
- Contributed to SOC 2 compliance initiatives by implementing security and code-quality improvements across production services.

Tata Consultancy Services (TCS) — Software Engineer, Backend

Indore, India | 2020 – 2021

- Developed backend services and financial workflow modules using Java, AngularJS, and SQL for enterprise finance platforms managing 1,000+ active contracts.
- Optimized cloud infrastructure across AWS and GCP environments, reducing operational costs by 15% while maintaining system availability and performance.
- Improved SQL query performance by 20%, enabling faster reporting and data retrieval for business-critical workflows.
- Automated testing and deployment pipelines using Jenkins CI/CD, accelerating release cycles and improving deployment reliability.
- Implemented secure development practices using Fortify and SonarQube, reducing vulnerabilities and strengthening compliance with enterprise security standards.

EDUCATION

Master of Science in Data Science

University at Buffalo (State University of New York, SUNY Buffalo)

2023 - 2025

New York, US

Bachelor of Technology in Electronics and Telecom Engineering

Symbiosis International University

2015 - 2019

Pune, IN
